A PHENOMENOLOGICAL THEORY OF THE ISO-THERMAL EVOLUTION OF QUENCHED GLASS
[1960] 6p. 4 refs.

Order from SLA mi\$1.80, ph\$1.80 61-10220

Trans. of Acad[emie] des Sci[ences, Paris]. Comptes Rendus (France) 1960 [v. 250, no. 1] p. 109-111.

A phenomenological theory of the isothermal contraction of quenched glasses is presented. This contraction is a non-Newtonian volume flow. In clarifying the terms of this flow we are led to an expression which contains only two parameters which also govern the viscoelastic behavior of super-cooled liquids.
